

EduMeet.Ai -- MATH101: Limits & Continuity Practice

Instructor: Dr. Robert Vance

1. L'Hopital's Rule:

- Used for indeterminate forms $0/0$ or ∞/∞ .
- $\lim_{x \rightarrow c} [f(x)/g(x)] = \lim_{x \rightarrow c} [f'(x)/g'(x)]$

2. Continuity Definition:

- $f(c)$ is defined, $\lim_{x \rightarrow c} f(x)$ exists, and $\lim_{x \rightarrow c} f(x) = f(c)$.
